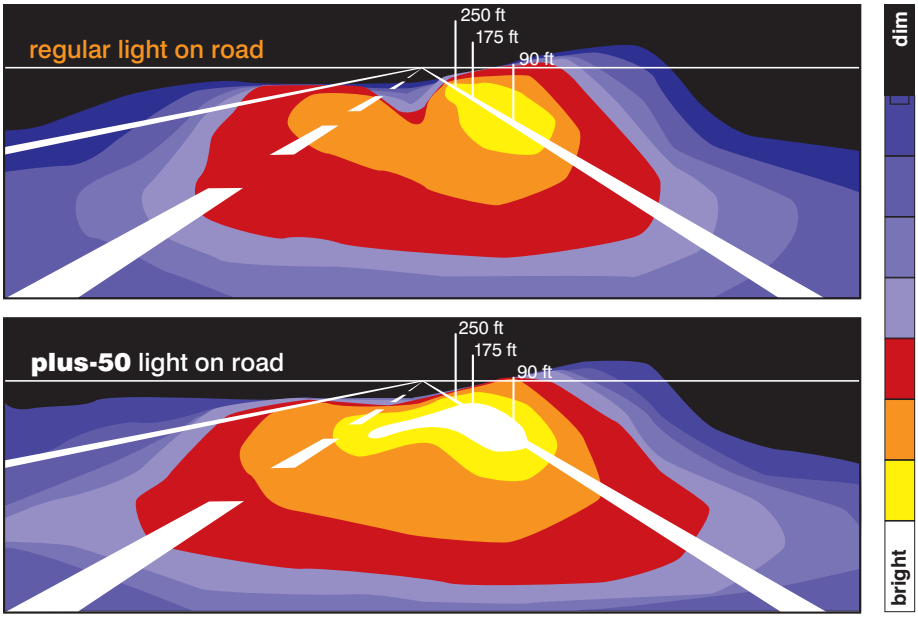
Xenon Bright Light Plus-50 Ultra Performance Bulbs

Up to 50% more light • World's best legal-wattage bulbs
Beam reaches up to 5 car lengths farther down the road



Candlepower's best Xenon Super Bright Light Plus-50 bulbs give the driver the ultimate possible lighting performance for premium safety and enhanced driving performance on dark roads and in foul weather. Tough independent tests give top ratings to these maximum efficiency bulbs, and prove they put up to 50 percent more light on the road, without dangerous overheating or electrical overloading. Obstacles and situations beyond 90 ft down the road can be clearly seen sooner, giving more time to react. These bulbs comply with DOT and/or ECE regulations for on-road use. Their precision focused filament coil and Xenon gas ensure a long, brilliant life, while their UV-blocking glass makes them safe to use in plastic headlamps. They are manufactured in Germany to our highest quality standards, and will not dim with age; over 90% of initial light output is maintained over the entire lifetime of the bulb. For the best available seeing performance in a street legal bulb, pick Xenon Super Bright Light Plus-50 ultra high efficiency bulbs. Nothing else even comes close.

Type	Replaces	Watts	Lumens	Hours
